

Software Collaboration with OpenSource

Which Software can be used for
collaboration?

Web Site:

www.soebes.com

Blog:

blog.soebes.com

Email:

info@soebes.com

Dipl.Ing.(FH) Karl Heinz Marbaise

Agenda

1. What we are talking about?
2. Overview
3. Detailed Features
4. Installation
5. Summarization

1. Collaboration Tools

- The basic idea of Collaboration tools is to have everything at a centralized place:
 - Tracking of Bugs, Changes, Requirement etc.
 - Documentation
 - Dashboard
 - Version Control

1. Collaboration Tools

- We are talking in particular about the following three Open Source Collaboration tools for Software Development.
 - GForge
 - trac
 - Redmine

1. Collaboration Tools

- Why?
 - These are tools which are specific developed for Collaboration.
 - Other tools support only partial areas for example Bug tracking, wiki etc.
 - Groupware supports only partially parts for collaboration like Bug tracking or “project management” etc.

2. Overview

2.1 GForge

2.2 Trac

2.3 Redmine

2.1 Overview GForge Start Page

FORGE Software/Group Search Log In [New Account](#)

Home My Page Project Tree Code Snippets Project Openings

GForge helps you manage the entire development life cycle

GForge has tools to help your team collaborate, like message forums and mailing lists; tools to create and control access to Source Code Management repositories like CVS and Subversion. GForge automatically creates a repository and controls access to it depending on the role settings of the project.

Additional Tools:

- Manage File Releases
- Document Management
- News announcements
- Surveys for users and admins
- Issue tracking with "unlimited" numbers of categories, text fields, etc
- Task management

Professional Services

The GForge project is supported and maintained by the GForgeGroup:

- Installation
- Support
- Online Training
- Integration into your network, with LDAP authentication
- See [GForge Group Professional Services](#) for more info.

Major New Features

Command Line Interface The unix-style interface to GForge uses the SOAP API to let you access, add, and update Bugs, Tasks, and File Releases. The [CLI Project](#) is always looking for enhancements, fixes, and feedback.

Tinderbox This widely-known build tool has been integrated with a GForge plugin, allowing project admins to setup and activate tinderbox building for their projects and view the results through the tinderbox plugin in GForge. The [Tinderbox Project](#) is always looking for volunteers.

More Powerful Tracker Major enhancements in the tracker include powerful new querying capabilities, new bugzilla-like fields by default, a configurable template project, and tracker cloning.

MS Project Integration A plugin has been developed for MS Project that allows it to synchronize tasks with GForge task manager subprojects. The [MS Project Plugin](#) is currently only available under a non-free license.

[Debian "unstable" Users](#) can simply "apt-get install gforge" to get a complete gforge system. Other debian users, can add some lines to /etc/apt/sources.list found at "<http://people.debian.org/~bayle/>" or "<http://people.debian.org/~lolando/>" and type "apt-get install gforge" to install a working GForge-3.0 system, thanks to Christian Bayle, Roland Mas and the Debian-SF project.

2.1 Overview GForge Admin

The screenshot displays the GForge Admin interface. At the top, there is a navigation bar with the GForge logo on the left and a search box in the center. The search box contains the text "Search the entire project" and a "Search" button. To the right of the search box are links for "Log Out" and "My Account", and a "Quick Jump To..." dropdown menu. Below the navigation bar is a horizontal menu with tabs for "Home", "My Page", "Project Tree", "Code Snippets", "Project Openings", "Admin", "Reporting", and "Test SVN Project". Underneath these tabs is a secondary row of tabs: "Summary", "Admin", "Activity", "Forums", "Tracker", "Lists", "Tasks", "Docs", "Surveys", "News", "SCM", and "Files".

The main content area is divided into several sections:

- Project Overview:** A text block stating "This is a test of SVN crons" and "This project has not yet categorized itself in the Trove Software Map." It also includes registration information: "Registered: 2008-08-10 22:06" and "Activity Percentile: 0%". Links for "View project Statistics or Activity" and "View list of RSS feeds" are provided.
- Developer Info:** A sidebar box containing "Project Admins: testsvn testsvn" and "Developers: svntest svntest testuser testuser". It also has links for "[View Members]" and "[Request to join]".
- Latest File Releases:** A table with columns "Package", "Version", "Date", "Notes / Monitor", and "Download". The table is currently empty, with the text "This Project Has Not Released Any Files" and a link "[View All Project Files]".
- Public Areas:** A section with a "Project Home Page" link and a "Tracker" section. The Tracker section lists:
 - [Bugs](#) (1 open / 1 total)
Bug Tracking System
 - [Support](#) (0 open / 0 total)
Tech Support Tracking System
 - [Patches](#) (0 open / 0 total)
Patch Tracking System
 - [Feature Requests](#) (0 open / 0 total)
Feature Request Tracking System
- Latest News:** A section titled "This is the first News Entry" with a timestamp of "2008-10-09 08:40". It includes links for "(0 Comment)", "[Read More/Comment]", "[News archive]", and "[Submit News]".

2.1 Overview GForge Admin

The screenshot displays the GForge Admin interface for the 'svntest' project. The top navigation bar includes tabs for Home, My Page, Project Tree, Code Snippets, Project Openings, Admin, Reporting, and svntest. The Admin tab is active, showing sub-tabs for Summary, Admin, Activity, Forums, Tracker, Lists, Tasks, Docs, Surveys, News, SCM, and Files. A search bar is located at the top right, and a 'Quick Jump To...' dropdown is also present.

The main content area is divided into two sections:

- Misc. Project Information:** This section provides details about the project, including a short description, homepage link (svntest.gforgedemo.com), group shell (SSH) server (svntest.gforgedemo.com), group directory on shell server (`/home/groups/svntest`), and project WWW directory on shell server (`/home/groups/svntest/htdocs`). It also includes a link to download a nightly SCM tree tarball.
- Group Members:** This section displays a table of group members with columns for Unix Name, Role, Update, and Remove. The 'Role' dropdown menu is open, showing options: Admin (selected), Senior Developer, Junior Developer, Doc Writer, and Support Tech. Below the table are links for 'Add Users From List', 'Pending Requests' (No Pending Requests), 'Edit Roles' (with a dropdown showing 'Admin' and an 'Edit Role' button), and 'Add Role'.

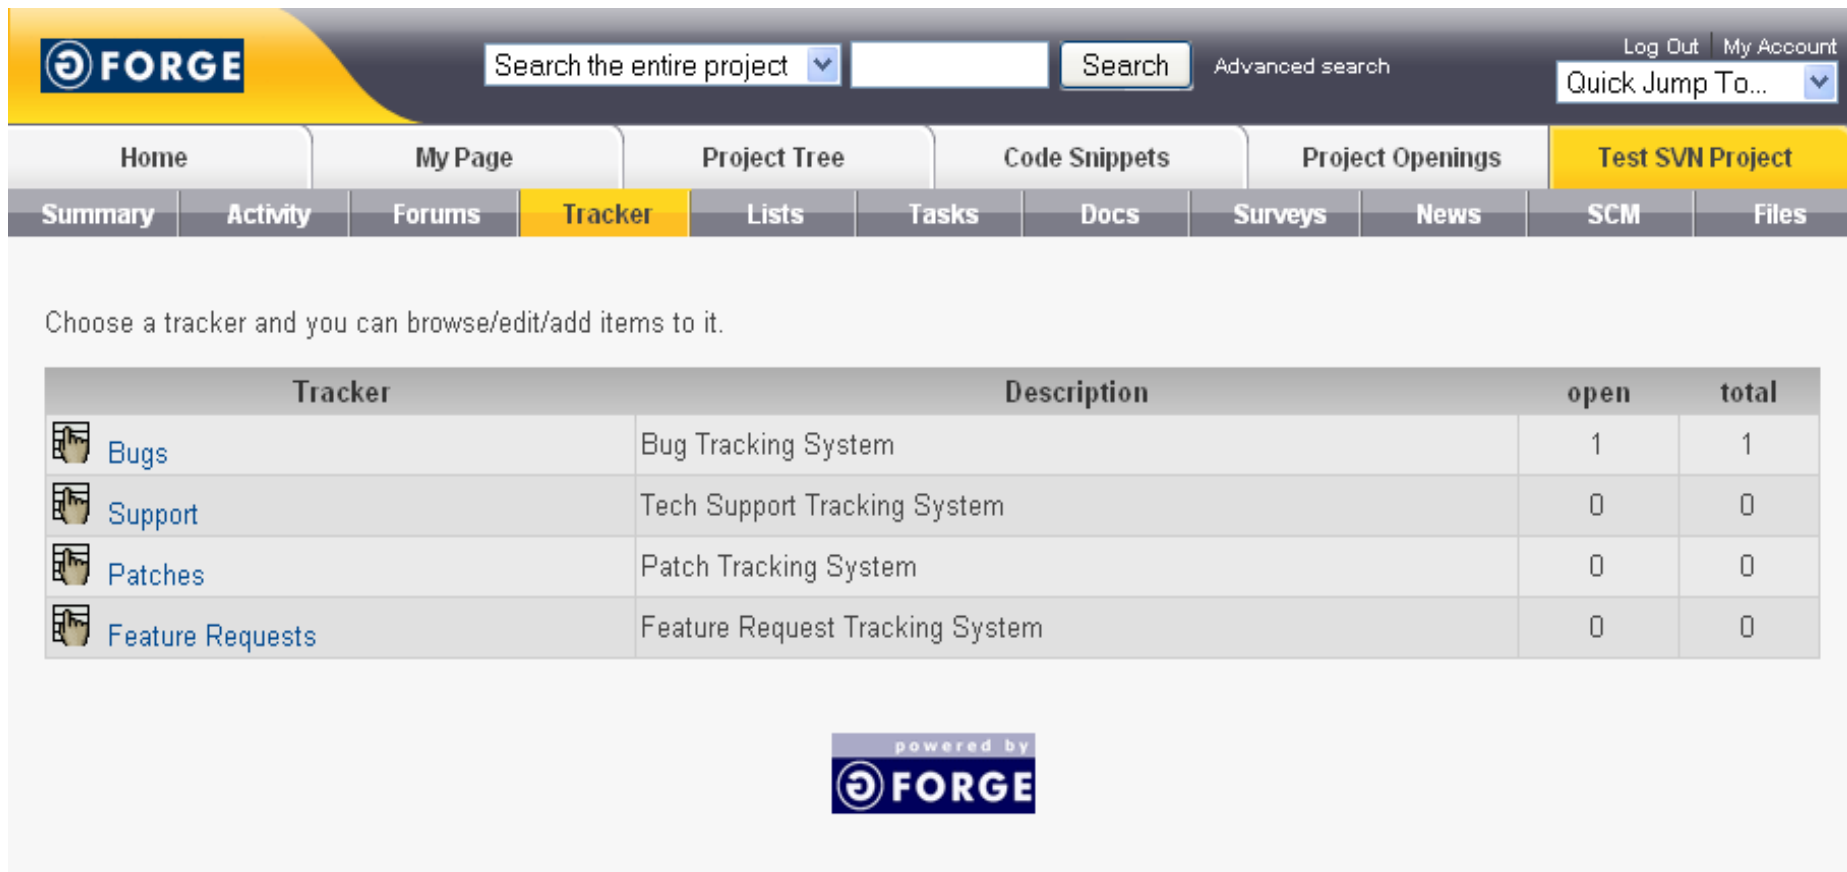

2.1 Overview GForge Activity

The screenshot shows the GForge web interface. At the top, there is a search bar with the text "Search the entire project" and a "Search" button. To the right, there are links for "Log Out" and "My Account", and a "Quick Jump To..." dropdown menu. Below the search bar is a navigation menu with tabs for "Home", "My Page", "Project Tree", "Code Snippets", "Project Openings", "Admin", "Reporting", and "svitest". Underneath, there is a secondary navigation bar with tabs for "Summary", "Admin", "Activity", "Forums", "Tracker", "Lists", "Tasks", "Docs", "Surveys", "News", "SCM", and "Files".

The "Activity" section is active, showing a date range from "2008-09-06" to "2008-10-06" and a "Submit" button. A dropdown menu is open, listing activity types: "Commits", "Tracker Opened", "Tracker Closed", "FRS Release", and "Forum Post".

Time	Activity	By
2008-10-02		
10:54:39	Forum Post Welcome to Open-Discussion	
10:54:39	Forum Post Welcome to Help	
10:54:39	Forum Post Welcome to Developers	

2.1 Overview GForge Tracker

The screenshot displays the GForge Tracker interface. At the top, there is a search bar with the text "Search the entire project" and a "Search" button. To the right, there are links for "Log Out" and "My Account", and a "Quick Jump To..." dropdown menu. Below the search bar is a navigation bar with tabs for "Home", "My Page", "Project Tree", "Code Snippets", "Project Openings", and "Test SVN Project". Underneath this is a secondary navigation bar with tabs for "Summary", "Activity", "Forums", "Tracker", "Lists", "Tasks", "Docs", "Surveys", "News", "SCM", and "Files". The "Tracker" tab is currently selected.

Choose a tracker and you can browse/edit/add items to it.

2.1 Overview GForge Single Ticket

The screenshot shows the GForge website interface. At the top, there is a navigation bar with the GForge logo on the left, a search box with the text "Search the entire project" and a "Search" button, and links for "Log Out" and "My Account" on the right. Below the navigation bar is a menu with tabs for "Home", "My Page", "Project Tree", "Code Snippets", "Project Openings", and "Test SVN Project". Under "Project Tree", there are sub-tabs for "Summary", "Admin", "Activity", "Forums", "Tracker", "Lists", "Tasks", "Docs", "Surveys", "News", "SCM", and "Files". The "Admin" tab is selected, and the "Lists" sub-tab is also selected. The main content area is titled "Admin" and contains the following text:

Mailing lists provided via a GForge version of [GNU Mailman](#). Thanks to the Mailman and [Python](#) crews for excellent software.

Choose a list to browse, search, and post messages.

Mailing list	Description	Subscription
testsvn-commits Archives	cvs commits	Subscribe/Unsubscribe/Preferences

At the bottom of the page, there is a "powered by" logo for GForge.

2.1 Overview GForge Single Ticket

The screenshot displays the GForge web interface. At the top left is the GForge logo. To its right is a search bar with the text "Search the entire project" and a "Search" button. Further right are links for "Log Out" and "My Account", and a "Quick Jump To..." dropdown menu. Below the search bar is a navigation menu with tabs for "Home", "My Page", "Project Tree", "Code Snippets", "Project Openings", and "Test SVN Project". Under "Project Tree", there are sub-tabs: "Summary", "Admin", "Activity", "Forums", "Tracker", "Lists", "Tasks" (highlighted), "Docs", "Surveys", "News", "SCM", and "Files". Below the navigation menu is a text prompt: "Choose a Subproject and you can browse/edit/add tasks to it." This is followed by a table with the following data:

Subproject Name	Description	Open	Total
To Do	Things We Have To Do	0	0
Next Release	Items For Our Next Release	0	0

At the bottom center of the interface is a logo that says "powered by" above the GForge logo.

FORGE

2.1 Overview GForge Tasks

The screenshot displays the GForge web interface for creating a task. At the top, there is a navigation bar with the GForge logo, a search box, and links for 'Log Out' and 'My Account'. Below this is a secondary navigation bar with tabs for 'Home', 'My Page', 'Project Tree', 'Code Snippets', 'Project Openings', and 'Test SVN Project'. A third navigation bar contains various project management options like 'Summary', 'Admin', 'Activity', 'Forums', 'Tracker', 'Lists', 'Tasks' (highlighted), 'Docs', 'Surveys', 'News', 'SCM', and 'Files'. The main content area features a 'To Do:' section with links for 'Browse Tasks', 'Add Task', 'Gantt Chart', 'Download as CSV', 'Upload CSV', 'Reporting', and 'Admin'. The task creation form includes a 'Submit' button, a 'Category' dropdown set to 'None (admin)', 'Percent Complete' and 'Priority' dropdowns set to 'Not Started' and '3' respectively, a 'Task Summary' text area, a 'Task Details' text area with a scroll bar, an 'Estimated Hours' text area, 'Start Date' and 'End Date' date pickers (set to October 5, 2008 and October 12, 2008), and two multi-select dropdowns for 'Assigned To' and 'Dependent on Task'. The 'Assigned To' dropdown lists 'None', 'svntest', 'testsvn', and 'testuser'. The 'Dependent on Task' dropdown lists 'None'. A note at the bottom states: 'You should choose only tasks which must be completed before this task can start.'

2.1 Overview GForge Docs

The screenshot displays the GForge documentation interface. At the top left is the GForge logo. A search bar is located at the top center with the text "Search the entire project" and a "Search" button. To the right of the search bar are links for "Advanced search", "Log Out", and "My Account". Below the search bar is a "Quick Jump To..." dropdown menu. The main navigation area consists of several tabs: "Home", "My Page", "Project Tree", "Code Snippets", "Project Openings", and "Test SVN Project" (which is highlighted in yellow). Below these tabs is a secondary row of navigation items: "Summary", "Admin", "Activity", "Forums", "Tracker", "Lists", "Tasks", "Docs" (highlighted in yellow), "Surveys", "News", "SCM", and "Files". Below the navigation area, there are links for "Submit new documentation", "View Documentation", and "Admin". A language selection dropdown is set to "English (1)" with a "Go" button. Below the language selection, there is a folder icon labeled "Uncategorized Submissions" containing a document icon labeled "This is the first doc. (3827316170 UML konzentriert (STD).pdf)". At the bottom center, there is a "powered by" logo for GForge.

Welcome to the Subversion Repository Search Engine (SupoSE)

Overview ¶

This is a Java based approach to do real searching within a complete Subversion repository. Based on performance issues and so on, I have decided not to do a real time scanning within the Repository. I have decided to do a scanning of the whole content of a Subversion repository. The result, called index can be used to do real searching. An other purpose of this approach is to be able to search through multiple repositories instead of one.

With the exception of binary files where no particular [document handler](#) exists, all files will be indexed.

This means we do not index only the trunk or the HEAD revision, we index all revisions on all paths within a whole Repository. Filename, path, log message etc. are made searchable ([see Fields for further details](#)).

[Have you ever put such questions to your repository?](#)

Features

Planned features1:

- ~~Scan a whole repository~~

2.3 Overview Redmine Project Overview

The screenshot shows the Redmine interface for a project named 'JaGoSI'. The top navigation bar includes 'Home', 'My page', 'Projects', and 'Help'. The user is logged in as 'kama' and can access 'My account' or 'Sign out'. A search bar and a 'Jump to a project...' dropdown are also present. The main navigation menu includes 'Overview', 'Activity', 'Roadmap', 'Issues', 'New issue', 'News', 'Documents', 'Wiki', 'Files', and 'Repository'. The 'Overview' page displays the project name 'Java GForge SOAP Interface' and a list of subprojects: 'GForge'. An 'Issue tracking' section shows 3 open bugs and 7 open features. A 'Members' section lists the reporter: 'kamaa -, manager -, somebody -, Karl Heinz Marbaise'. A right-hand sidebar contains 'Planning' (Calendar | Gantt) and 'Spent time' (2.00 hours, Details | Report).

2.3 Overview Redmine Roadmap

The screenshot shows the Redmine interface for the JaGoSI project. The top navigation bar includes links for Home, My page, Projects, and Help. The user is logged in as 'kama' with options for My account and Sign out. The main navigation menu includes Overview, Activity, Roadmap (selected), Issues, New issue, News, Documents, Wiki, Files, and Repository. The Roadmap section displays a milestone for '0.0.11' due in 9 days (10/17/2008). A progress bar indicates 38% completion. Below the progress bar, it shows 5 closed issues (36%) and 9 open issues (64%). A list of related issues is provided, including Feature #16, #19, #81, #83, #84, #104, #106, #133, and #134. On the right side, there is a sidebar with a 'Roadmap' section containing a 'Feature' checkbox (checked), a 'Show completed versions' checkbox (unchecked), and an 'Apply' button. Below this is a 'Versions' section showing the current milestone '0.0.11'.

3. Detailed Features

3. Detailed Features Comparison

- User Features
 - Wiki
 - GForge PlugIn; New release MediaWiki, but has to be configured separately.
 - Ticket System

3. Detailed Features Comparison

- User Features
 - Time Tracking
 - Trac via PlugIn
 - Supplemental Timesheet / Budget PlugIn's in Redmine
 - Task Manager
 - Only in Gforge
 - Next Release of Redmine

3. Detailed Features Comparison

- User Features
 - File Area
 - Not in Trac
 - Document „Management“ System
 - Not in Trac

3. Detailed Features Comparison

- User Features
 - Forums
 - Trac PlugIn
 - Repository Browser
 - GForge ViewVC
 - Mailing Lists
 - GForge Mailman; GForge only

3. Detailed Features Comparison

- User Features
 - Multi project support
 - Not in Trac
 - Sub Projects
 - Only in Redmine
 - Custom fields for Tracker (Bugs, Support, Patch, Feature Request)
 - Redmine site wide

3. Detailed Features Comparison

- User Features
 - Project creation
 - Trac only command line based
 - GForge and Redmine
 - Via UI

3. Detailed Features Comparison

- User Features
 - Supported Version Control Tools:
 - CVS
 - Not supported by Trac
 - Redmine using CLI
 - Subversion
 - Trac out of the box (Python bindings)
 - Redmine using CLI

3. Detailed Features Comparison

- User Features
 - Supported Version Control Tools:
 - ClearCase (PlugIn)
 - GForge Only
 - Perforce, Mercurial, Monotone, Git, Bazaar, Darcs
 - Trac by PlugIns
 - Mercurial, Git, Bazaar, Darcs
 - Redmine support via CLI

3. Detailed Features Comparison

- User Features
 - Remote Repository Support:
 - GForge
 - No
 - Trac
 - No
 - Redmine
 - Yes

3. Detailed Features Comparison

- Technical Features
 - Supported OS's
 - GForge Linux Only!
 - Trac and Redmine support Linux, Windows and Mac OS
 - User self-registration support
 - Can be turned of in Redmine

3. Detailed Features Comparison

- Technical Features
 - LDAP authentication support
 - Trac via Apache
 - Redmine/GForge more or less fully integrated.

3. Detailed Features Comparison

- Technical Features
 - Supported Database Management Systems (DBMS):
 - Redmine
 - MySQL, PostgreSQL, SQLite, Oracle, DB2, SQLServer (Ruby On Rails)

3. Detailed Features Comparison

- Technical Features
 - Supported Database Management Systems (DBMS):
 - GForge
 - PostgreSQL only
 - Trac
 - SQLite3 (default), PostgreSQL, MySQL

3. Detailed Features Comparison

- Technical Features
 - GForge
 - More or less full SOAP Interface which can be accessed by different Languages (PHP, Python, Java).
 - Example in Java
<http://jagosi.soebes.de>
 - Some bugs in there ;-)

3. Detailed Features Comparison

- Technical Features
 - Trac
 - SOAP/RPC PlugIn exists
 - Redmine
 - Currently no SOAP/RPC support but in the issue list.

3. Detailed Features Comparison

- Technical Features
 - Trac
 - Migration support from Bugzilla, Mantis and via CSV list.
 - Redmine
 - Migration from Trac, Bugzilla and Mantis.

4. Installation

4.1 Installation

GForge

- Installation of GForge
(min. 1 Day; usually more...)

The first lines of the INSTALL Text:

Installation of GForge is a non-trivial undertaking, since it integrates with so many different components across your system. A skilled sysadmin is required to pull it off, or at the least a great deal of patience.

4.2 Installation

Trac

- Implemented in Python
- Installation can be done in about 15-30 Minutes
 - If you familiar with Python less than 15 Minutes

4.2 Installation Redmine

- Implemented in Ruby with Ruby on Rails
- Installation can be done in about 15-30 Minutes
 - If you familiar with Ruby less than 15 Minutes

Summarization

- Make your decision on which collaboration software you will use in the futuer.
